At just 3.65 lbs., the VAIO® 13.3" S Series laptop offers a step up to the performance and portability you demand. From its seamless contours to advanced technology that offers up to 12 hours and 30 minutes of combined battery life (with optional extended sheet battery)[10] the S combines bold design and mobile performance. Equipped with a 2nd gen Intel® Core™ i7 processor, a powerful AMD Radeon HD 6630M graphics card, and 4GB of memory, the S is a serious contender for your mobile computing needs.

Take it with you

With uncompromising attention to detail and a passion for design, Sony introduces the next generation in VAIO® laptop design. Simple yet bold, the S Series features a fully flat design concept that abandons traditional bulky batteries, unnecessary seams and protruding ports.

Combining a brushed aluminum palmrest shaped to precise specifications and a magnesium alloy chassis, the S Series offers firm structural integrity while creating bold clean contours.

Killer Premium Hybrid Graphics

By utilizing a powerful AMD Radeon™ HD 6630M graphics card with 1GB VRAM[6], you'll experience premium visual quality and intense HD performance without placing huge demands on the CPU. Plus, the VAIO® S Series puts you in control by offering a Hybrid Graphics system that allows you to easily set your graphics performance to deliver power when you need it and energy savings when you don't. You can even set your performance level on the fly without needing to reboot.

A simple hardware switch enables you to choose between two settings. Select Speed for maximum power while multi-tasking or running heavier applications or select Stamina to conserve energy and extend battery life for light computing and mobile scenarios.

HDD G-Sensor™ Shock Protection technology

G-Sensor™ Shock Protection technology counteracts sudden movements by locking up the spinning hard drive to help prevent potential damage, such as scratching, which could lead to data loss.

Bold and Bright

Developed by the same people you trust to engineer amazing flat-panel HDTVs, this laptop features unbelievably crisp picture quality, making your photos and movies more enjoyable. The 13.3" (1600 x 900) widescreen display includes an LED backlight that helps ensure a bright display with lower power consumption for improved battery life.

Enjoy on your HDTV

Now enjoy all of your personal and online content on your big screen-by wirelessly connecting your laptop to your TV. Stop crowding around a laptop screen, with Intel® Wireless Display, you can sit back and experience your favorite videos, photos, movies, online TV shows, and more, all with great image clarity up to 1080p.
